Visiting the Protected Area

During your tour in the National Marine Park of Zakynthos, you will have the chance to visit the *Caretta caretta* nesting beaches and see the oldest and most loyal visitor of the island, the loggerhead sea turtle, the Mediterranean monk seal *Monachus monachus*, a high biodiversity since it encompasses a considerable number of marine flora (>170 species) and fauna (> 300 species) expanding from the shallower to the deeper parts of the seabed, as well the richness of terrestrial habitat and flora species. Do not forget *Falco eleonorae* and the *Calonectris diomedea* as well many other migratory birds, whose cross the skies.

We hope that you will be able to understand the beauty and importance of the N.M.P.Z, contribute on its effective protection.
